

JUST THE FACTS: DRUGS, VAPING, AND CULTURE

Teens and Drugs; What do parents need to know

Poudre High School is hosting a 3-night parent event to learn more about marijuana, today's teen culture, vaping and other substances. These nights will provide information on teenage brain development, substance abuse warning signs, and talking tips so that you can engage in open and honest conversations with your teenager.

Lauren Kiel, Bethany Condon, and Katelyn O'Grady are the High School Substance Abuse Specialists and School Counselors. They would love to share up to date and accurate information with families in effort to help keep our students healthy!
